**Your new
gas fire
operating
system**

i may be small, but I am faster, safer, and smarter

As the new operating system for DRU Eco Wave gas fires, I am keeping up with the needs of the customer. I now connect via Bluetooth, making it faster, safer and smarter. And did you know that I have a new, user-friendly remote control and improved app? This makes me easier to operate and even easier for you as a dealer to read.

i am  since 1754

About the operating system

The new operating system applies to all DRU RCH gas fires and will be implemented in the course of 2022.

All models will feature the new remote control and updated DRU app.

What's new?

All our Eco Wave RCH gas fires will be operated using Bluetooth rather than Wi-Fi, ensuring faster and safer connections. The impressive new remote control has now separate buttons for each function and a large, clear display, ensuring effortless control.

The DRU app has been re-designed and has additional functions. It now works with DRU gas and electric fires and is still compatible with the existing Wi-Fi module. Dealers can now use the app to check the status of a fire, either remotely or on location. This results in improved customer service and greater consumer satisfaction.

Advantages for all RCH gas fires

- ◆ No extra Wi-Fi module (worth £ 228) needed.
- ◆ Faster and safer than existing Wi-Fi connection.
- ◆ Communication using app or remote control.
- ◆ Extensive service menu (accessible remotely).
- ◆ Separate buttons for each function on the remote control.
- ◆ The fire can be operated by multiple users and devices.

Facts

Did you know?

I am able to pair from a distance? Your service technician will be better prepared on the road.
